

national coal committees in New York, Chicago, St. Louis, Cleveland, Atlanta, Boston, Pittsburgh, Philadelphia and Baltimore, Va.

Attorney-General Palmer said this afternoon that the "situation was quiet," and that little change could be expected until Monday or Tuesday. In addition to the "off day" at the majority of the mines, was a church holiday, and this probably accounted for many of the reports from coal centers which declare that none of the workers had put in an appearance this morning.

"They are going to get protection," Mr. Palmer said. "They are going to get protection." "They are," Mr. Palmer's reply. "The Attorney-General was asked whether or not he could say anything regarding the return of Judge Ames from Indianapolis."

"No," he said, "he got what he went out there for."

Mr. Palmer's assurance that the men who remained at work would receive protection was borne out today at the War Department, when it was learned there were approximately forty-four regiments of infantry in the army departments which included the largest number of soft-coal mines.

Another serious element in connection with the coal strike is the attitude of the miners' helpers, and other unionized workers at coal mines from which the miners have walked out. The strike order did not include these men, because they were deemed necessary for the protection of the mines, especially against fire and flood.

If the government attempts to use a combination labor to work the mines, these men might walk out, it was said, and their positions, which are some of the most specialized, would be hard to fill.

Complete details of the distribution plans of the railroad administration are as follows:

1. Bituminous coal will be handled by the director-general and the regional directors through the agency of a central coal committee and regional coal committees which will be established jointly by the regional directors and the fuel administration. Such regional coal committees will comprise the following representatives:

One appointed by the United States fuel administrator and such others as the regional director may select to handle matters of purchase, distribution and accounting.

To meet emergency needs.

2. The bituminous coal held must be distributed only to those consumers who have no reserve supply and must have coal for their emergency needs. Then follows the priority list issued last night.

3. When commercial coal is diverted to other than original consignee, promptly notify shipper and original consignee of each change, and make adequate record for later settlement.

4. Originating coal roads should hold considerable portion of the commercial coal near coal waybill points, available for prompt distribution.

5. Intermediate and terminal carriers should, as far as practicable, move commercial coal to and hold in the vicinity of points most convenient for prompt rehandling and distribution.

6. Coal may not be delivered to commercial consumers except in accordance with the priority list, except with specific authority from the coal committee having jurisdiction.

7. Regional directors will immediately notify each railroad of the regional coal committee with which it will deal.

8. Each railroad will at once notify the central coal committee and the regional committee of its choice of representative to deal for it on the coal strike.

Must Make Daily Reports.

9. Daily reports shall be made to the central committee by each regional committee of either its supply or requirements of coal.

10. A similar report shall be made daily by wire by each railroad to its regional committee.

11. A summary of coal situation in every part of the country will be sent daily to the central committee.

12. All applications for coal must be submitted on a blank form furnished by the railroad administration, which will enable its agents to determine whether or not there is absolute just need of the fuel.

13. A record shall be kept of every order authorizing the delivery of coal.

14. All coal diverted for uses shall be paid for in accordance with the administration's order, dated January 14, 1918.

The Hand That Rocked My Cradle Rules My Heart My Baby's Arms	(from "Ziegfeld Follies, 1919") "The Hand That Rocked My Cradle" is such a tribute to a demobilized soldier might give to the mother who waited for his homecoming. "My Baby's Arms" is not a song of motherhood at all; the "Baby" is full-grown, and she calls the singer "Baby" in turn.	John Steel John Steel	18611	10	35
When I'm Gone You'll Soon Forget Weeping Willow Lane	Henry Burr and Frank Croton appear together for the first time in a beautiful melody song. The Peerless Quartet is at its best in a song of deep sentiment.	Peerless Quartet Henry Burr-Frank Croton	18609	10	35

And He'd Say Oo-La-La! Wee-Wee - Dixie Once More	"Oo-La-La Wee-Wee" is about all the French that Willie Earl could learn, and he picked that much up in the trenches. L'Elisir D'Amore—Venti Scudi	(Elixir of Love—Twenty Crowns) This famous duet is practically a whole scene from one of the most brilliant of the old Italian operas. There are swift answering passages, recitatives, a cadenza, and a climax in which Caruso's voice soars high into the clouds, the voice of De Luca bearing on beneath as a magnificent river rolls under the arch of a mighty bridge.	Caruso-de Luca	89089	12	200
